

2026 SPR and ECPN Awards Nominations

Deadline: Friday, March 13, 2026

ALL award nomination materials should be submitted via e-mail to Jennifer Lewis at jenniferlewis@preventionresearch.org.

SPR Awards Criteria

Awards are designed to recognize excellence in the areas consistent with SPR's [mission, visions and values](#). We encourage nominations of SPR members at all career levels and nominations that reflect the full diversity of SPR's membership. The specific awards are as follows:

1. The **Presidential Award** is given to an individual or a team of individuals who have made a major specific contribution to prevention science research. This award is intended to be a “lifetime achievement” award for a significant body of research or theory in any area related to prevention that has had a major impact on the field. The award can be for an entire research program extending over many years or for a single study that changed the field substantially. The awardee(s) may represent the fields of epidemiology, statistical methodologies, research design, or prevention strategies including interventions and policies.
2. The **Prevention Science Award** is given to an individual or team of individuals for a significant body of research that has applied scientific methods to test one or more preventive interventions or policies. This award recognizes individuals for the work of developing and testing prevention strategies.
3. The **Public Service Award** is given to an individual or team of individuals in recognition of extensive and effective advocacy (to include dissemination and diffusion) for prevention science and science/research-based programs.
4. The **Translational Science Award** is given to an individual or a team of individuals in recognition for contributions to the field of prevention science in the area of Type 1 or Type 2 translational research.
5. The **Nan Tobler Award** for Review of the Prevention Science Literature is given to an individual or a team of individuals for contributions to the summarization or articulation of the empirical evidence relevant to prevention science.

6. The **Advances in Culture and Diversity in Prevention Science Award** (formerly the Community, Culture and Prevention Science Award) is given to an individual or a team of individuals for contributions to the field of prevention science in the area of culture. Recipients of this award are recognized for work to enhance understanding of culture in prevention science and the development of and adaptation of effective prevention strategies for traditionally underserved and/or underrepresented populations, including racial and ethnic minorities.
7. The **International Collaborative Prevention Research Award** is given to an individual or a team of individuals for contributions to the field of prevention science in the area of international collaboration.
8. The **Service to SPR Award** is given to an individual or a team of individuals in recognition of outstanding service to the organization.

SPR Awards Nominations Process

Deadline: Friday, March 13, 2026

Eligibility:

- With the exception of the Public Service Award which may be given to a non-member, awards are intended for SPR members.
- Nominee and nominator must be a member of the Society for Prevention Research at the time of nomination.

We recommend you check the membership status of your potential nominee in advance. Contact Jennifer Lewis at jenniferlewis@preventionresearch.org.

The SPR Award Nomination Packet should include:

- (1) **One Letter of Nomination**, briefly (under 1000 words) describe why you are nominating this individual (or group). What important contributions has this person (or group) made to the field of prevention science in relation to the specific award category. We encourage nominations of SPR members at all career levels and nominations that reflect the full diversity of SPR's membership.
- (2) **CV** (NIH bio sketch or similar)
- (3) **Link to the nominee's website.**

ALL SPR award nomination materials should be submitted via e-mail to Jennifer Lewis at jenniferlewis@preventionresearch.org.

SPR/ECPN Awards Nominations Process

Deadline: Friday, March 13, 2026

MISSION: The Society for Prevention Research is an international, multi-disciplinary organization dedicated to advancing scientific investigation about how to prevent negative outcomes and foster well-being for individuals, families, and communities. We also seek to ensure this knowledge promotes a healthy and equitable society through the use of research-informed and socially just programs, practices, and policies.

VISION

To be a diverse and inclusive community that leads the promotion of a healthy and equitable society through prevention science.

VALUES

- **Collaboration:** partnerships with youth, families, practitioners, policy makers, public and private sectors, communities, schools, and other social institutions in the US and internationally.
- **Community:** our organization as a “home” for prevention science researchers, practitioners, and policy makers and a nexus for collective action.
- **Diversity, Equity, Inclusion, and Accessibility:** diversity among our members and partners in terms of their identities, abilities, career stages, and academic disciplines and approaches. We are committed to fostering equity among these groups.
- **Integrity:** using transparent, fair, and ethical practices in our research, advocacy, and organization.
- **Respect:** the dignity, worth, and agency of all individuals.
- **Science and Practice:** the use of rigorous scientific, practice-based, contextual, and experiential evidence.
- **Social Justice:** efforts to undo the negative impact of systems of oppression and inequity.

STRATEGIC PLAN GOALS, 2024 - 2028

Goal 1: Promote Health Equity in Prevention Science

Goal 2: Translate Prevention Science for Use in Diverse Settings

Goal 3: Advocate for Prevention Science

Goal 4: Increase Member Support, Engagement, and Diversity Within SPR

ECPN John B. Reid Early Career Award Information for Nominations Review

Purpose: This award is presented annually by the Early Career Preventionist Network to a person early in their career in prevention.

- 10 years or less from terminal degree (e.g., PhD, MD, master’s if that is final degree)

This award will be bestowed on someone who has shown a commitment to prevention science through outstanding contributions to research, policy, or practice.

- Conducts thoughtful and intentional prevention research with a clearly defined goal in line with the <https://preventionresearch.org/about-spr/mission-statement/>
 - Aligned with Strategic Plan Goal 4, to increase member support, engagement, and diversity within SPR.
- Regardless of method/approach, work demonstrates:
 - Potential to advance health and well-being, especially for populations who are structurally marginalized (e.g., research focused on advancing well-being for under-represented or equity-deserving populations)
 - Clear implications for prevention with potential for important impact on defined population(s) (i.e., not just ‘high impact’ - but potential for real-world impact). This can include many methodologies (e.g., secondary data, genetics research, participatory action research), and work focused more on the ‘discovery’ end of prevention science (e.g., etiology), as well as more applied work.
 - If the work *is* applied, engage with ‘community’ in a meaningful way, as relevant to the program of work, to advance prevention practice and/or policy. Community can be many things (e.g., patients in a hospital, youth in the community, a specific population, geographic community, problem-based).
- Evidence of meaningful contributions (commensurate with experience/area of research) to:
 - academic knowledge translation (e.g., publications, conference presentations, program evaluation reports)
 - non-academic knowledge translation (e.g., translation to community policy makers or practitioners, dissemination of findings through media, etc.)
 - advancement of prevention science through a track record of external funding (e.g., grants, contracts, state/local grants)
- In addition to the above, to demonstrate broader commitment to prevention science, examples can include engagement with:
 - Relevant community(ies) of focus (e.g., working with community or cultural liaisons/brokers; working with youth or patient advisory boards; involved in boards or committees that have potential to shift policy/practice; volunteering; working with students/trainees from these areas).
 - SPR or ECPN (or other prevention science organization)
 - Other prevention-relevant causes/initiatives (e.g., advocacy, policy work)

Eligibility:

- 10 years or less from terminal degree (e.g., PhD, MD, master’s if that is final degree)
 - Nominee and nominator must be a member of the Society for Prevention Research at the time of nomination.

Tips:

- In the nomination and support letters, it is not just about who is writing (e.g., how ‘big’ they are in prevention), but *what* they are writing - how do they talk about the potential impact of the person’s research and potential in the area?
- Impact should be determined holistically. For instance, someone with two smaller local grants that directly advance research with a marginalized population may be making more of an impact/demonstrating more commitment to prevention science than someone who is a Co-Investigator on a number of larger grants. Consider quality *and* quantity, as well as stage of career.

ECPN: Email nominations to: Jimikaye Courtney,
jimikaye@unc.edu **and Jennifer Lewis,**
jenniferlewis@preventionresearch.org.

Friend of ECPN Award Nomination

Purpose: The **Friend of ECPN Award** is presented to a mid-career or senior preventionist who has supported and encouraged early career persons or issues.

The recipient of the Friend of ECPN award will have been active in supporting early career activities, either by helping ECPN as an organization; promoting training, funding, and/or early career involvement in prevention efforts; or encouraging early career preventionists in their work.

- Evidence of successful support of early career prevention scientists and trainees (undergraduate, graduate, postdoc). Examples include:
 - Offering support to ECPN (e.g., sitting on ECPN panels, providing guidance to ECPN members)
 - Advocating for the needs to of early career/trainee prevention scientists (e.g., in terms of funding, inclusion in SPR)
 - Providing training and/or funding to advance early career/trainee involvement in prevention research, policy, practice and/or advocacy
 - Providing prevention science mentorship to early career researchers/trainees

Eligibility:

- Nominee and nominator must be a member of the Society for Prevention Research at the time of nomination.

Tips:

- This is not a research award. This award celebrates more advanced career prevention scientists who are a champion for early career researchers/trainees, whether through formal or informal mentorship, training, advocacy, etc.

Awards History

The SPR Awards were first presented in 1997.

Fellowship is an honor that the Society for Prevention Research bestows upon a small and select group of members who have a particularly distinguished record of contributions in the field of prevention research. A distinguished record is a substantial body of work that has had a broad and significant impact on prevention science.

2025 – J. Mark Eddy, Ph.D., Steven M. Kogan, Ph.D., Emily Tanner-Smith, Ph.D.

2024 – Allison Barlow, Ph.D., Emilie Smith, Ph.D.

2023 – Richard Spoth, Ph.D., Elizabeth Stormshak, Ph.D.

2022 – Kevin Haggerty, Ph.D., Leslie D. Leve, Ph.D.

2021 – Bonnie Leadbeater, Ph.D.

2020 – Daniel Shaw, Ph.D.

2019 – Karen Linn Bierman, Ph.D.; Richard F. Catalano, Jr., Ph.D. (Emeritus); Margaret E. Ensminger, Ph.D. (deceased); Steven Y. Sussman, Ph.D.

2018 – Anthony Biglan, Ph.D. (emeritus), Kenneth A. Dodge, Ph.D., Deborah Gorman-Smith, Ph.D., Mary Ann Pentz, Ph.D., Alexander Wagenaar, Ph.D.

2017 – Diana Fishbein, Ph.D., John E. Lochman, Ph.D., and Sharlene Wolchik, Ph.D.

2016 – Brian Flay, Ph.D. (deceased), Robert McMahon, Ph.D., and Steven Schinke, Ph.D. (deceased)

2015 – Linda M. Collins, Ph.D., Thomas Dishion, Ph.D. (deceased), John Graham, Ph.D. (emeritus), and Mark Greenberg, Ph.D. (emeritus)

2014 – C. Hendricks Brown, Ph.D., William B. Hansen, Ph.D., Elizabeth B. Robertson, Ph.D. (deceased), and Helene Raskin White, Ph.D. (emerita)
